

Dear Sirs,

I've been a subscriber to Satellite Radio for about 8 months. Let me tell you right now that I will never go back to regular radio. Satellite Radio offers more variety, information, and generally better programming than local radio. I am able to listen to programs that are not offered anywhere in my state by local radio. I get to listen everyday to MSNBC, CNN News, CNN Headline, C-Span, Fox Sports Radio, Espn Radio, Sporting News, and the BBC. Only NPR on local radio comes anywhere close to the quality of programming that XM Satellite offers. Please do not try to impede the spreading of Satellite Radio.

I am a general big supporter of the Bill of Rights. I support every person's right to bear arms, and I support every person's right of free speech. Support the Bill of Rights, do not listen to the NAB's lobby of limiting Satellite Radio and let Satellite Radio express its 1st Amendment Rights. Thank you for listening to my plea.

Sincerely,

Antonio Rodriguez
